

## Mobile Phone View Instruction

Our IP Camera is easy for users to view from mobile phone, just login by his mobile phone, such as Iphone & Smartphone, which supports Windows Mobile I.E., Safari, Opera browsers & Java Client Application.

Here is the mobile phone view instruction!

### 1. Dynamic DNS Application

This IP Camera support dynamic DNS of [www.3322.org](http://www.3322.org) and [www.dyndns.org](http://www.dyndns.org). Enter the applied dynamic domain name, user name, password, and click "Save" to access device through WAN.

The screenshot shows a web interface titled "Dynamic DNS" with the following fields and options:

DDNS Provider:	<input type="text" value="www.3322.org(dyndns)"/>
Dynamic DNS:	<input type="text" value="maygion.3322.org"/>
User:	<input type="text" value="maygion"/>
Password:	<input type="password" value="•••"/>
Enabled	<input checked="" type="checkbox"/>
Status:	Disabled

At the bottom left, there is a "Save" button.

### 2. Enter the WAN domain name in the smart mobile phones

3. Enter the user name, password, and select smart phones landing.

4. Enter the user Interface, then same as view by computer monitor.
